1.1	10.01.2022	Łukasz Sacha	Updated to match iOS app
1.2	06.10.2022	Łukasz Sacha	New app with local storage

Policies

1. Application does not collect any user data.
2. Application stores the device's (HRM Fan) configuration locally on the phone.
3. Most operations are done locally on your device. There is only one call to an external server, at each start of the application, to see if there is an update for a ROM on your HRM Fan device. The external server is a google driver repository. If there is an update and the user accepts it – it is downloaded to your phone and installed on HRM Fan.
